CLASSIFICATION

ORG-2026-01

16 August 2026 · Revision 1.3 — Karel allocation rebase

INTERNAL · CONFIDENTIAL

01 FOUNDING COMPACT

Sentra begins with people, not titles. Technology extends human judgment and empathy; it does not replace accountable human decision-making. Success is shared fairly. Failure is examined collectively, without scapegoating, to improve the system.

- Human first: integrity, accountability and care are non-negotiable.
- AI augments everyone: one governed intelligence layer supports each function within approved access boundaries.
- Human authority: final judgment, accountability and escalation remain with named human leaders.
- Modular resources: the core team owns shared capabilities and uses external specialists for bounded expertise.

02 CORE OPERATING ROLES

ROLE	ACCOUNTABILITY	AI SUPPORT
dr. Ferdi Iskandar, S.H., M.Kn. · Founder & CEO	Vision, capital allocation, system architecture and final executive control.	Strategic copilot: research, scenarios, drafting and simulation.
Asyraf Hadi · Growth	Commercialisation, partnerships, early customer acquisition and brand.	Growth intelligence: prospect qualification, proposals and CRM follow-up.
Josep Arianto · Operations	Corporate administration, compliance, daily operations and people operations.	Operational intelligence: checklists, cost reconciliation and deadlines.
dr. Novia Anggraini · Founding Core — Clinical	Clinical governance, safety requirements, SOAP accuracy and evidence interpretation.	Clinical intelligence: literature search, drafting and FHIR/SATUSEHAT review.
Karel Sinatra · Core Team — Academic & Business Development	Commercialises Sentra Academic/Tutor Smartboard; leads institutional pilots, customer discovery, partnerships, adoption and revenue accountability.	Academic & commercial intelligence: pipeline, conversion, retention and product-market feedback.
Farhan Nugroho, S.T. · Founding Contributor — Infrastructure	Uptime, deployment, backup, network troubleshooting and system reliability.	Reliability copilot: logs, anomaly detection and incident runbooks.

03 INDEPENDENT ADVICE AND VALIDATION

STAKEHOLDER	MANDATE	BOUNDARY
Widya Puti Melinda, S.Psi., M.M.	Financial and operational advisory.	Advisory; no executive delegation.
Kevin Susanto, B.Eng., MTech IS	Independent technical review of code, cloud security and API compliance.	Review and recommendation.
dr. Dibya Arfianda, Sp.OG. / dr. Boyong Baskoro, Sp.OG.	Independent clinical pass/fail validation before clinical release.	May block release; development team cannot override clinical safety failure.

04 DECISION RIGHTS

DECISION TIER	EXAMPLES	DECISION OWNER
Founder-only	Core product thesis, primary AI architecture, capital allocation, material external partnerships.	Founder & CEO
Domain-owned	Daily growth, operating execution, clinical governance, Academic go-to-market/pilots and server triage.	Asyraf, Josep, dr. Novia, Karel Sinatra or Farhan within their domain
Council input	Major launches, cross-product direction, regulatory risk.	Founding Council advises; Founder decides
Independent validation	Clinical release readiness and patient-safety gates.	Independent Validator Panel

05 OPERATING RHYTHM

- Weekly Founding Council: 60 minutes maximum—what changed, what is blocked, what needs a Founder decision, and the next three non-negotiable priorities.
- Daily domain stand-up: asynchronous where possible; blockers escalated with owner, impact and requested decision.
- Monthly operating review: objectives, risk register, cash, service reliability, customer evidence and compliance status.
- Incident protocol: protect users first, preserve evidence, appoint an incident owner, communicate facts and complete a learning review.

06 SCALE ARCHITECTURE

PHASE	TEAM SIZE	OPERATING MODEL	REDESIGN TRIGGER
0–1	~6–11	Founder, Founding Core, Karel Sinatra Core Team, Founding Contributor and advisory network.	Daily span of control exceeds coordination capacity.
2	~15–25	Dedicated Engineering, Clinical, Growth and Corporate Operations teams.	A product stream needs a dedicated accountable owner.
3	50+	Formal C-level structure and delegated operating bureaucracy.	PT transition, VC audit or formal external investment.

07 ECONOMIC PARTICIPATION

Legal ownership and economic participation are separate. Initial legal ownership remains with the Founder. Charter v1.3 allocates 32.5% of Safe Distributable Profit to Mission & Innovation Capital, 30.0% to Founder participation, 7.5% to Karel Sinatra as Core Team — Academic & Business Development, and 30.0% to the active Founding Team pool. Karel's participation is drawn solely from Mission & Innovation Capital; the Founder and Founding Team pool remain unchanged, subject to the Phantom Stock Agreement and applicable law.

PARTICIPATION BUCKET	POOL %	EFFECTIVE SAFE-PROFIT %
Mission & Innovation Capital	—	32.5%
Founder participation	—	30.0%
Karel Sinatra · Core Team — Academic & Business Development	Direct; sourced only from Mission & Innovation Capital	7.5%
Asyraf Hadi · Founding Core — Growth	30% of Founding Team pool	9.0%
Josep Arianto · Founding Core — Operations	30% of Founding Team pool	9.0%
dr. Novia Anggraini · Founding Core — Clinical	28% of Founding Team pool	8.4%
Farhan Nugroho, S.T. · Founding Contributor — Infrastructure	12% of Founding Team pool	3.6%
TOTAL DISTRIBUTABLE PROFIT	—	100.0%

Karel owns the Academic Solutions and related business-development domain: institutional pipeline, pilots, customer discovery, partnerships, adoption, revenue accountability and structured product-market feedback. He is Core Team, not Founder or Founding Core; he receives no legal shares automatically and holds no veto over Founder-only decisions.

ILLUSTRATIVE DISTRIBUTABLE PROFIT	SENTRA 32.5%	FOUNDER 30%	KAREL 7.5%	FOUNDING TEAM 30%
Rp1.00bn	Rp325m	Rp300m	Rp75m	Rp300m

Rp5.00bn	Rp1.625bn	Rp1.500bn	Rp375m	Rp1.500bn
Rp10.00bn	Rp3.250bn	Rp3.000bn	Rp750m	Rp3.000bn

CONTROL NOTE

This charter is an internal operating baseline. It does not create employment, equity, fiduciary or economic rights beyond those expressly documented in approved contracts and corporate resolutions.
