

# MedBoard

See Earlier. Decide Better.

Clinical Smartboard by Sentra

---

Brand identity system • Logo masters • Digital assets • Usage rules

# 01 / Brand Core

Minimal clinical intelligence. Human authority remains final.

## See Earlier. Decide Better.

MedBoard is positioned as a Clinical Smartboard by Sentra.

The symbol communicates structured clinical information without relying on generic medical clichés.

The visual system is deliberately restrained: clear, technical, calm, and decision-oriented.

### CORE PRINCIPLE

## Technology enables, but humans decide.

AI amplifies clinical intelligence; certified clinicians retain final medical decision authority.

# 02 / Logo System

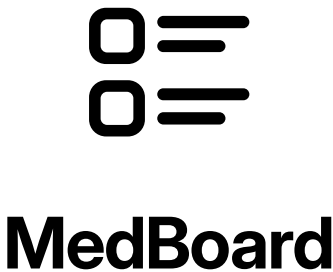

Primary, stacked, and mark-only configurations.

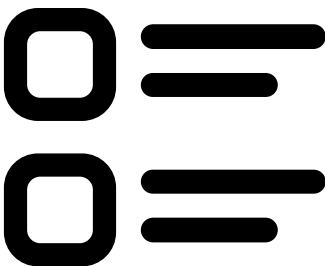

**PRIMARY HORIZONTAL LOCKUP**  
Default for headers, documents, and wide layouts.

**REVERSED HORIZONTAL LOCKUP**  
Use on black or sufficiently dark backgrounds.

**STACKED**

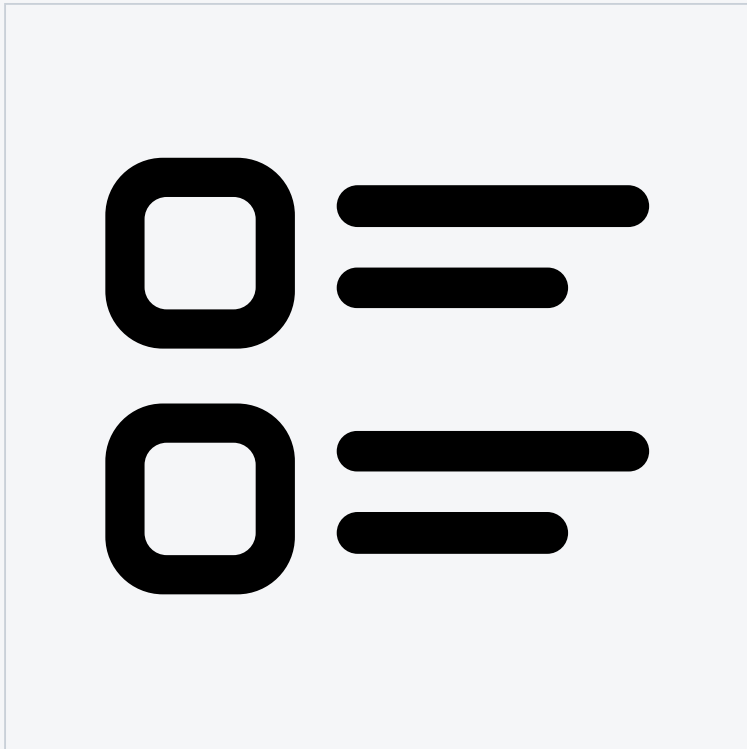

**MARK ONLY**

Use the mark alone for app icons, favicons, avatars, or compact system surfaces where MedBoard is already known.

# 03 / Construction & Clear Space

Preserve the proportions of the approved master geometry.

Clear space = at least 1x around all sides

## Geometry

- Two equal rounded-square nodes
- Two horizontal data bars per node
- Upper bar longer than lower bar
- Consistent stroke weight and corner language
- No additional medical symbols inside the mark

## Minimum size

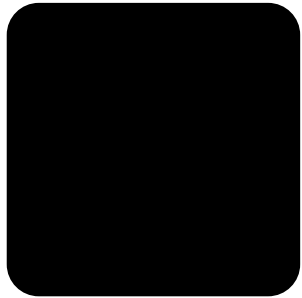

Mark: 16 px digital / 6 mm print

Horizontal logo: 120 px digital / 30 mm print

Below minimum size, use mark-only rather than compressing text.

# 04 / Color System

Monochrome first. Accent is optional and digital-only.

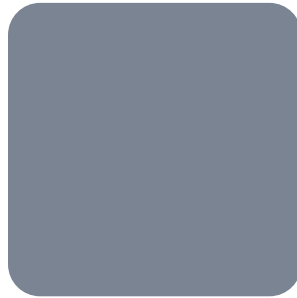

**MedBoard Black**

#000000

**MedBoard White**

#FFFFFF

**System Gray**

#7B8493

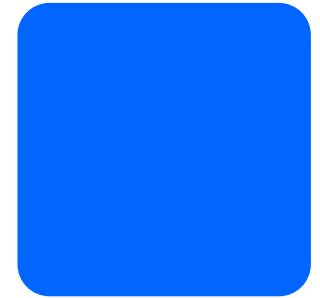

**System Navy**

#07111F

**Accent Cyan**

#00C2FF

**Accent Blue**

#0066FF

## RULE

Black/white is the official default. Use the blue-cyan accent only for digital hierarchy, not as a mandatory logo treatment.

Never reduce contrast for aesthetic effect: clinical interfaces require immediate readability.

## 05 / Typography

Logo artwork is outlined. Editable source references Inter.

# Inter Display Bold

Display / product naming / major headings

## Inter Regular

Body copy / captions / interface support text

### IMPLEMENTATION NOTE

Official SVG/PDF/EPS lockups contain outlined lettering and do not depend on installed fonts.

Font files are intentionally not included in this package. Editable source uses the Inter family by name only.

## 06 / Correct Usage

Keep the identity quiet, precise, and recognizable.

### DO

- Use black on white or white on black
- Maintain clear space
- Use supplied master proportions
- Prefer the mark alone at very small sizes

### DON'T

- Do not stretch or skew
- Do not rotate the mark
- Do not add drop shadows or outlines
- Do not insert crosses, ECG lines, or extra symbols

# 07 / Asset Map

Everything in this kit is ready for print, web, and the MedBoard app.

|                  |                                                    |
|------------------|----------------------------------------------------|
| 01_LOGO_VECTOR   | SVG / PDF / EPS master artwork                     |
| 02_LOGO_PNG      | Transparent raster exports at production sizes     |
| 03_APP_ICONS     | Favicons, Apple touch icon, Android / PWA icons    |
| 04_SOCIAL        | Open Graph and social preview cards                |
| 05_BRAND_TOKENS  | JSON / CSS design tokens and web manifest          |
| 06_NEXTJS_READY  | Drop-in assets for the MedBoard Next.js App Router |
| 07_SOURCE_MASTER | Editable SVG layouts with live text references     |
| 08_PREVIEWS      | Brand sheet and package previews                   |

## PRIMARY LOCKUP

MedBoard | See Earlier. Decide Better. | Clinical Smartboard by Sentra
