

CORPORATE DOCUMENT / V1.1

Corporate Document Usage Guide

How to author, adapt, review, and approve documents using the v1.1 system.

Sentra documents are information systems in print: structured, objective, aligned, and quiet.

v1.1

AUTHORITY

SSOT v1.1 / CANONICAL

SWISS / INTERNATIONAL TYPOGRAPHIC STYLE • GRID • TYPE • RHYTHM • CLARITY

01 START WITH THE DECISION**CONTENT BEFORE FORM**

Before touching layout, define what this document is meant to accomplish, who must read it, what decision or action it should enable, and which sources are authoritative. The template supplies visual structure; it does not supply facts.

- 01** Confirm the controlling SSOT and medium-specific canonical system before using references.
Define objective in one sentence.

-
- 02** Name the primary audience and decision-maker.

-
- 03** List canonical / approved source material.

-
- 04** Mark missing facts as TBD or unverified; do not fill them from memory.

-
- 05** Choose only the sections needed for the objective.

02 USE THE GRID**DO NOT FILL THE PAGE**

The system depends on asymmetric balance. Main content should dominate one side of the composition while metadata or context occupies a smaller zone. Empty space is structural. Do not “fix” an intentionally open area by adding a box, graphic, icon, or secondary message.

-
- KEY POINT** If the page feels too empty, first check whether the hierarchy is strong enough. Do not add decoration as a substitute for hierarchy.
-

03

WRITE INTO TYPE ROLES

ARCHIVO / PLEX / MONO

IF THE CONTENT IS...	USE...	DO NOT USE...
Major title / section	Archivo	IBM Plex Mono as display
Long-form explanation	IBM Plex Sans	Archivo for paragraphs
ID / status / date / metric	IBM Plex Mono	Body sans for technical labels
Numeric table column	IBM Plex Mono	Proportional figures where alignment matters
Subsection	Archivo	Body face or mono as hierarchy substitute

**04 CHOOSE COMPONENTS SPARINGLY**

WHITESPACE FIRST

01 Use Key Point only for a takeaway that changes interpretation or action.

02 Use Decision Box only for an actual decision required or recorded.

03 Use Risk / Issue only when there is a material problem, exposure, dependency, or control gap.

04 Use Data Table when comparison or structured evidence is faster to understand than prose.

05 Use Quote / Principle for a governing rule or short authoritative statement, not motivational decoration.

06 Use Numbered Recommendations only when sequence or discrete actions matter.

05 STATUS & CONFIDENTIALITY

TEXT + SIGNAL

Every issued document must state DRAFT, REVIEW, or FINAL in text. Status may use a restrained symbol or accent, but the word itself is mandatory. Confidentiality is likewise explicit text in the cover metadata and footer when applicable.

STATUS	MEANING	ALLOWED USE
DRAFT	Working content; incomplete or unverified elements may remain	Internal collaboration
REVIEW	Content/design substantially formed; approval or verification pending	Review circulation
FINAL	All required source, content, brand, format, and approval gates passed	Official issuance

06 TABLES & NUMBERS

PRINT-LEGIBLE

Tables use horizontal rules and whitespace, not dense cell boxing. Header rows are explicit. Numeric columns use IBM Plex Mono and align consistently. Avoid heatmaps or multiple colored fills unless the data genuinely requires them and remains understandable in grayscale.

07

QA BEFORE RELEASE

VISUAL + CONTENT

01

SOURCE VERIFIED - authority and version confirmed.

02

FACTS VERIFIED - no unsupported corporate, legal, medical, financial, or regulatory claims.

03

BRAND COMPLIANT - visual root, approved mark, typography, and color rules followed.

04

AUTHORITY VERIFIED - draft/reference material has not been promoted silently.

05

FORMAT VERIFIED - DOCX and PDF render correctly with no clipping, overflow, or broken tables.

06

AUDIENCE FIT - density and language match the intended reader.

07

NAMING VERIFIED - status, document type, topic, and version/date are correct.

08

LIBRARY DESTINATION IDENTIFIED - artifact status and repository location are known.

DECISION

A document is FINAL only when every applicable QA gate passes. Visual polish never substitutes for source authority or approval.

08 FILE NAMING & GOVERNANCE

REVIEW BY DEFAULT

Use: [STATUS] - SENTRA_AI - [Document_Type] - [Topic] - [YYYY-MM-DD or Version]. Generated working files remain REVIEW or PROJECT-ONLY until the appropriate governance owner approves promotion.

EXAMPLE	STATUS
REVIEW - SENTRA_AI - Partnership_Proposal - Hospital_X - 2026-09-20	Review
FINAL - SENTRA_AI - Company_Profile - 2026	Final after gate
DRAFT - SENTRA_AI - Policy_Addendum - v0.2	Draft

A APPENDIX

REFERENCE / OPTIONAL

Appendices preserve the same grid, typography, table logic, and footer furniture as the main document. They may carry denser evidence, source notes, or technical detail, but they do not become a different visual system.

REF	ITEM	STATUS
A.01	Source inventory	Verified
A.02	Supporting data	Attach / reference
A.03	Approvals	Record as applicable
